Marshall VISAR technology featured in TV show Saturday

At 8 p.m. Saturday, on "America's Most Wanted," Fox 54 is expected to air a segment about Video Imaging Stabilization and Registration (VISAR) — a video stabilizing technology developed at the Marshall Center by Dr. David Hathaway and Paul Meyer of the National Space Science and Technology Center.

OPM to e-mail surveys to 400 Marshall scientists, engineers

Approximately 400 scientists and engineers at the Marshall Center should soon receive an e-mail survey from the U.S. Office of Personnel Management (OPM) as part of a government-wide study of scientific and engineering occupations. Data collected will help OPM revise and update position classification and qualification standards for scientific and engineering positions.

Marshall Volunteer Program kickoff meeting Thursday

The Government and Community Relations Department will hold a meeting for civil servants and contractors interested in helping local charities and non-profit organizations. Marshall's Volunteer Program will meet at 10 a.m. Thursday in Bldg. 4200, room P110. For details, call Vanessa Lindsey at 544-5663.
